Professional Summary

Full Stack Developer with mid-level experience building scalable web applications using Python (Frappe/FastAPI), TypeScript, Angular, and Vue.js. Delivered 8+ custom ERPNext modules and automated workflows that streamlined daily operations and improved page load speed. Deployed containerized applications on AWS and Docker, enhancing reliability and release efficiency. Seeking to leverage full-stack and ERP automation expertise to drive high-performing solutions for your organization.

Work Experience

Assimilate Technologies

Full Stack Developer — *Pune* · **Mar 2024 - Aug 2026**

Python, Frappe, Node.js, Express.js, JavaScript, TypeScript, MariaDB, Vue.js

- Engineered and maintained 8+ custom ERPNext modules for HRMS, CRM, Inventory, and Real Estate, supporting system adoption across multiple client deployment sites
- Designed and deployed specialized Frappe extensions, including Gate Management and Dashboards automating workflows for daily operational transactions.
- Optimized Vue.js component architecture and state management, accelerating frontend page load speed and enhancing user retention.
- Architected REST APIs and database layers with Python, Express.js, and MariaDB, reducing data transfer errors and speeding up queries
- Configured Ubuntu servers and deployed containerized applications with Docker and AWS, improving system reliability, reducing deployment times, and supporting efficient resource scaling

Software Engineer Intern — *Pune* · **Dec 2023 - Feb 2024**

Maintained backend logic for the KUULI platform using Python, Express.js, PostgreSQL, and MariaDB.

- Built custom Frappe modules and indexed PostgreSQL/MariaDB tables, decreasing API response latency and improving overall platform query throughput.

Technical Skills

- **Programming Languages**: Python, TypeScript, JavaScript, SQL, Java, PHP, C
- **Frontend Technologies**: Angular, Vue.js, Tailwind CSS, Bootstrap, HTML, CSS
- **Backend & Frameworks**: Express.js, FastAPI, Node.js, Frappe, Flask, Spring Boot, Hibernate
- **Databases & ORM**: PostgreSQL, MySQL, MariaDB, MongoDB, Redis, Firebase
- **Cloud & DevOps**: AWS, Docker, Git, GitHub, Nginx, Linux, Ubuntu

Education

Master of Computer Applications (MCA) — **Jun 2020 - Apr 2022**
ASMA Institute of Management — *Pune*

Bachelor of Computer Applications (BCA) — **Jun 2017 - Apr 2020**
New Arts Commerce and Science College — *Ahmednagar*

Projects

Production Scheduling & Mold Management Tool (MSS)

Assimilate Technologies — *Pune*

- **Tech Stack:** Python, Vue.js, JavaScript, Frappe Framework, ERPNext
- **Capacity & Workflow Automation:** Built a custom ERPNext module streamlining production scheduling by calculating shift capacity against Bill of Materials (BOM) requirements and auto-generating Sales Orders from Blanket Orders.

- **Asset Tracking Integration:** Integrated mold lifecycle, maintenance, and availability tracking into the scheduling engine to prevent resource conflicts and optimize shift planning.
- **Integration:** Designed as a specialized MSS (Master Production Scheduling) tool for ERPNext/Frappe.

HRMS Biometric Integration Tool & Resume Lens App
Assimilate Technologies
- **Tech Stack:** Python, React.js, JavaScript, Frappe Framework, ERPNext, REST APIs
- **Resume Processing Automation:** Engineered an automated recruitment tool using React.js and Python to extract resume data and streamline candidate parsing workflows directly inside ERPNext.
- **Hardware & Systems Integration:** Architected a real-time biometric attendance sync system in Python, connecting physical attendance logs with ERPNext for automatic shift mapping.
- **Process Optimization:** Streamlined core HR operations, drastically reducing manual data entry errors and accelerating candidate intake and daily attendance tracking.

Multi-Stack E-Commerce & Showcase Platform
- **Tech Stack:** Angular, TypeScript, Python (Flask), PHP, MySQL, Bootstrap, REST APIs
- **Frontend Engineering:** Designed and built responsive, component-driven e-commerce user interfaces using Angular and core PHP, optimizing mobile UX and dynamic product filtering.
- **Backend & API Architecture:** Developed RESTful micro-services in Flask (Python) and PHP to handle dynamic product catalogs, inventory management, and category administration.
- **Database & Admin Control:** Structured MySQL relational database schemas to store transaction data and built custom admin panel dashboards for seamless content and category updates.

Software TechIT Cross-Platform Platform (Web & Mobile)
SoftwareTechIT
- **Tech Stack:** Angular, Node.js, Express.js, MongoDB, Android (Java/XML), Python, REST APIs
- **Full-Stack Architecture:** Architected a multi-platform solution consisting of a responsive web application and an Android mobile app connected to a shared REST API backend.
- **Web Engineering:** Built dynamic UI components using Angular and Node.js, integrating MongoDB for scalable content storage and user data management. Applied SEO and content marketing strategies, boosting website traffic by 40%.
- **Mobile & API Integration:** Engineered an Android app in Java/XML, integrating YouTube APIs and backend REST endpoints for real-time video streaming and content delivery.

Certifications
- Angular Developer: SP Institute
- Android Development: SEED InfoTech
- C++ Developer: SEED InfoTech
- Java (Hibernate, Spring Framework): SEED InfoTech
- Web Component Developer (WCD): SEED InfoTech
- Data Structure using C: SEED InfoTech
- Full Stack Web Developer Program: Edureka in July 2023

Achievements
- **Android Workshop:**Participated in a 3-day Android Workshop in 2017, conducted by Radiance IIT Bombay at NAC&SC College.
- **Fest Dev-Tech C Programming & Web Development:**Competition by IMS College.
