## CAREER OBJECTIVE

Full Stack Developer with 2.7+ years experience focused on developing and maintaining ERPNext and Frappe applications. Successfully delivered custom modules for HRMS, CRM, inventory, hospital, and school management, improving user experience and system reliability. Skilled in building backend APIs with Spring Framework and PostgreSQL, streamlining integration and data processing. Eager to leverage a broad full-stack skill set to drive effective and scalable business solutions.

## WORK EXPERIENCE

### Assimilate Technology | *Full Stack Developer*

Mar 2024 - Present

Python, Frappe, Node.js, Express.js, JavaScript, Typescript, MariaDB, Vue.js

- **ERPNext & Frappe Development:** Built and maintained applications (HRMS, CRM, Hospital, Real Estate, Inventory, School Management, HR, ERP, Frappe School) by creating modules and fixing bugs to improve functionality and client adoption.
- **Custom Module Innovation:** Designed and deployed specialized Frappe modules-including Mold Management, Gate Management, MSS Tools for Schedule Production, Resume Lens App, Gate Management, Dashboards, and Biometric Integration-automating workflows and access control.
- **Responsive Frontend Engineering:** Built high-performance, accessible web apps using JavaScript, Typescript, Node.js, HTML5, CSS3, Bootstrap, TailwindCSS, Vue.js, and React.js, successfully accelerating page load speeds and user experience.
- **Backend API & Database Architecture:** Developed robust backend APIs and data layers utilizing Python, Express.js Framework, MariaDB, and MySQL, reducing data transfer errors while optimizing real-time processing.
- **DevOps & Cloud Deployment:** Configured server setups and deployed containerized applications on Ubuntu using Docker and AWS, boosting system reliability, cutting deployment times, and enabling efficient resource scaling.

### *Software Intern*

Dec 2023 - Feb 2024

I Am Responsible For handling ERPNext Frappe, Python, Express, JavaScript, Mariadb, Postgresql for client and maintain KUULI Backend ,I Have had an excellent track record and have been awarded star employee for several quarter

## TECHNICAL SKILLS

- **Programming Languages:** Python, Typescript, JavaScript, Java
- **App Development:** Android Developer, React Native
- **Operating Systems:** Windows, Linux, Ubuntu
- **Databases:** PostgreSQL, MySQL, MongoDB, RDBMS, MariaDB, Firebase, Redis
- **Frameworks:** Angular, Frappe, FastAPI, Spring Framework, Spring Boot, React, Vue.js, Flask
- **ORM:** Hibernate Framework
- **Cloud & Tools:** AWS, Docker, Git, GitHub, Nginx
- **Markup and Scripting Languages:** HTML5, CSS3, PHP, XML, JSP, Bootstrap, jQuery, Tailwindcss

## EDUCATION

ASMA Institute of Management | *MCA* (GPA: 9.15 CGPA)

Pune 2020 - 2022

New Arts Commerce and Science College | *BCA* (GPA: 8.29 CGPA)

Ahmednagar 2017 - 2020

Shri. Jalandhar High School | *12th* (GPA: 80%)

Raimoha 2016 - 2017

Shri. Jalandhar High School | *10th* (GPA: 67.40%)

Raimoha 2014 - 2015

## PROJECTS

### MSS Tools For Schedule Production | *Assimilate Technologies*

Nov 2025

- **Tech Stack:** Developed using Vue.js for the frontend and Python for the backend.
- **Core Functionality:** Built to streamline monthly production scheduling directly from capacity planning data.
- **Workflow Automation:** Automatically generates Sales Orders from Blanket Orders. For items with a Bill of Materials (BOM), the tool calculates required capacity and available shifts to automatically schedule individual Work Orders per shift.
- **Integration:** Designed as a specialized MSS (Master Production Scheduling) tool for ERPNext/Frappe.

### Renu Sales & Purchase Modules Project | *Assimilate Technologies*

Aug 2025 - Sep 2025

- Developed and customized ERPNext modules for sales and purchase workflows.
- Improved transaction processing and system automation across the platform.
- Enhanced UI interactions and backend logic to support business operations.
- Developed Using Python, JavaScript, Frappe, ERPNext

### Mold Management Module Frappe | *Assimilate Technologies*

Nov 2025

- Developed a custom module to track mold lifecycle, maintenance, and usage.

- Automated notifications and reporting for mold availability and scheduling.
- Developed Using Python, JavaScript, Frappe

### **Resume Lens App | *Assimilate Technologies***

**May 2025**

- Built ERPNext-based automation for resume processing and data extraction.
- Integrated React.js front-end with Frappe/ERPNext backend for dynamic workflows.
- Improved performance and optimized API-driven processes.
- Developed Using Python, React.js, Frappe

### **HRMS & Biometric Integration Tool | *Assimilate Technologies***

**Jun 2025**

- Engineered a real-time biometric attendance sync tool integrated with ERPNext.
- Automated daily attendance, shift mapping, and logs synchronization.
- Improved HRMS efficiency by reducing manual entry and errors.
- Developed Using Python, JavaScript, Frappe

### **Gate Management Frappe | *Assimilate Technologies***

**Jul 2025**

- Developed a gate-pass and visitor management solution integrated with ERPNext.
- Implemented biometric access validation and automated entry/exit logs.
- Enhanced security workflows through server-side automation and monitoring.
- Developed Using Python, JavaScript, Frappe

### **SoftwareTechIT Website | *SoftwareTechIT***

**Jan 2022 - Mar 2022**

- Developed a responsive corporate website using Angular and Node.js.
- Implemented dynamic content rendering and optimized UI/UX components.
- Built REST APIs and integrated MongoDB for content and user data.
- Developed Using Python , Angular, Typescript, Bootstrap,

### **Web Story & Accessories Website**

**Oct 2022 - Dec 2022**

- Created a product showcase website using core PHP and MySQL.
- Designed front-end UI using Bootstrap and optimized mobile UX.
- Built admin panel features for managing products and categories.

### **Ecommerce Website Project**

**Apr 2022**

- Built Angular based e-commerce UI with dynamic product components.
- Developed Flask backend APIs. Bootstrap, Python, Typescript

### **Covid-19 Hospital Management System Project**

**May 2021**

- Developed modules for patient management, beds availability, and staff records.
- Implemented CRUD operations and database relationships using PostgreSQL.
- Designed a clean desktop UI with Java Swing.

### **SoftwareTechIT Android App | *SoftwareTechIT***

**Aug 2021 - Nov 2022**

- Built an Android app with YouTube API integration for streaming content.
- Designed UI layouts in XML and prototypes in Figma.
- Implemented REST API calls for dynamic video and content updates.

## **CERTIFICATIONS**

- |                                                |                                                     |
